

Graphics Order Flow

We make the graphics process simple and easy to manage:

Step 1: Select Your Graphics

Choose from the exhibitor manual or work with our team to determine what best fits your booth and goals.

Step 2: Receive Templates and Specifications

Our team will provide exact sizes, templates, and requirements for your selected graphics.

Step 3: Submit Artwork

Upload your print-ready files or work with our design team to create custom graphics.

Step 4: Review and Approval

We will review your files and provide a proof if needed. Final approval is required before production begins.

Step 5: Production and Installation

Your graphics are printed, prepared, and professionally installed prior to the show opening.

This process ensures your booth is ready, accurate, and visually impactful.
